DETAILED ACTION

1. In an effort to enhance communication with our customers and reduce processing time, Group 1640 is running a Fax Response Pilot for Written Restriction Requirements. A dedicated Fax machine is in place to receive your responses. The Fax number is 703-308-4315. A Fax cover sheet is attached to this Office Action for your convenience. We encourage your participation in this Pilot program. If you have any questions or suggestions please contact Paula Hutzell, Ph.D., Supervisory Patent Examiner at Paula.Hutzell@uspto.gov or 703-308-4310. Thank you in advance for allowing us to enhance our customer service. Please limit the use of this dedicated Fax number to responses to Written Restrictions.

2. Applicant's amendment filed 11/2/00 (Paper No. 2) is acknowledged and has been entered.

3. Restriction to one of the following inventions is required under 35 U.S.C. § 121:

I. Claims 37-40 and 44, drawn to a method for treating an IgE-mediated allergic disease in a mammal comprising administering a formulation comprising an antibody which binds IgE and a lyoprotectant, classified in Class 424, subclasses 130.1, 141.1, 145.1 and Class 514, subclasses 53 and 54.

II. Claims 37-39, 41 and 44, drawn to a method for treating a parasitic infection in a mammal comprising administering a formulation comprising an antibody which binds IgE and a lyoprotectant, classified in Class 424, subclasses 130.1, 141.1 and 145.1 and Class 514, subclass 53 and 54.

III. Claims 37-39, 42 and 44, drawn to a method for treating interstitial cystitis in a mammal comprising administering a formulation comprising an antibody which binds IgE and a lyoprotectant, classified in Class 424, subclasses 130.1, 152.1 and 156.1 and Class 514, subclass 23.

IV. Claims 37-39, 43 and 44, drawn to a method for treating asthma in a mammal comprising administering a formulation comprising an antibody which binds IgE and a lyoprotectant, classified in Class 424, subclasses 130.1, 152.1 and 156.1 and Class 514, subclass 23.

4. Inventions I, II, III and IV are different methods of use.

These inventions are methods for treating different diseases which have different pathologies, etiologies, symptoms and prognoses.

Therefore they are patentably distinct.

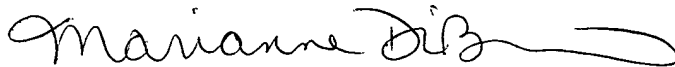

5. Because these inventions are distinct for the reasons given above and the search required for any group from Groups I-IV is not required for any other group from Groups I-IV and Groups I-IV have acquired a separate status in the art as shown by their divergent subject matter, restriction for examination purposes as indicated is proper.

6. Applicant is advised that the response to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed.

7. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 C.F.R. § 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a diligently-filed petition under 37 C.F.R. § 1.48(b) and by the fee required under 37 C.F.R. § 1.17(h).
